

Problem-Solution Fit

Date	03 JULY 2026
Team ID	XXXXXX
Project Name	A Comprehensive Measure of Well-Being
Maximum marks	5 Marks

Problem-Solution Fit Canvas:

1. CUSTOMER SEGMENT(S) [CS] - Government policymakers - Researchers & data analysts - Students (academia) - NGOs & development organizations - International organizations (UNDP, World Bank, etc.)	6. CUSTOMER LIMITATIONS EG. BUDGET, DEVICES [CL] - Limited technical expertise in machine learning & data analysis - Time-consuming manual analysis - Limited access to reliable and up-to-date development data - Dependence on static reports & publications	5. AVAILABLE SOLUTIONS PROS & CONS [AS] Pros: - Official HDI reports (UNDP) - Academic research papers - Statistical tools & spreadsheets Cons: - No real-time prediction - Complex calculations - Limited visualization & insights - Not user-friendly for non-experts
2. PROBLEMS / PAINS + ITS FREQUENCY [PR] - Difficulty in calculating HDI manually - Large datasets are hard to analyze - Lack of real-time HDI prediction - Difficult to compare countries instantly - Limited visualization of development trends - Time-consuming data interpretation Frequency: High	9. PROBLEM ROOT / CAUSE [RC] - HDI depends on multiple socio-economic indicators, making analysis complex - Existing solutions focus on historical reports, not predictions - Lack of interactive tools for quick analysis & visualization - Data scattered across multiple sources leading to inefficiency	7. BEHAVIOR + ITS INTENSITY [BE] - Frequently search for HDI data & reports - Compare development levels of countries - Rely on official reports for decision-making - Use spreadsheets or tools for analysis Intensity: High
3. TRIGGERS TO ACT [TR] - Need for policy formulation - Academic research requirements - Compare countries for reports & projects - Track development improvements - Need for quick & reliable predictions	10. YOUR SOLUTION [SL] HDI Insight – A Comprehensive Measure of Well-Being is an AI-powered web application that: - Predicts HDI category (Very High, High, Medium, Low) using Machine Learning - Accepts key indicators: Life Expectancy, Mean Years of Schooling, Expected Years of Schooling, GNI per Capita - Provides real-time predictions with high accuracy - Offers interactive visualizations and development insights - Easy-to-use interface for non-technical users - Helps policymakers, researchers & students make data-driven decisions	8. CHANNELS OF BEHAVIOR [CH] ONLINE - HDI Insight Web Application - Government & UNDP Websites - Research Databases - Academic Portals & Journals - Social Media & Online Communities OFFLINE - Research Reports & Publications - Policy Meetings & Conferences - Academic Institutions - Government Offices & Workshops
4. EMOTIONS BEFORE / AFTER [EM] Before: Confused, Overwhelmed, Uncertain, Frustrated After: Confident, Informed, Satisfied, Empowered
