

Brainstorming and Idea Prioritizing

Date	03 JULY 2026
Team ID	XXXXXX
Project Name	A Comprehensive Measure of Well-Being
Maximum marks	3 Marks

Step 1: Brainstorm and Idea Listing

S.NO	Team Member	Idea/Suggestion	Category
1	Leela Kanakala	Develop a Machine Learning model to predict a country's Human Development Index (HDI) category based on indicators such as life expectancy, expected years of schooling, mean years of schooling, and Gross National Income (GNI) per capita.	Machine Learning
2	Manthena Ashmitha	Prepare comprehensive project documentation, including project proposal, reports, workflow, user manual, and technical documentation to support project development and presentation.	Documentation
3	Deekshitha Pathi	Perform dataset exploration, exploratory data analysis (EDA), and create meaningful visualizations to understand relationships among HDI indicators and identify patterns in the data.	Data Analysis
4	Potti Sri Lakshmi Chetan	Perform data preprocessing by handling missing values, selecting relevant features, splitting the dataset into training and testing sets, and preparing the data for machine learning model development.	Data Preprocessing
5	Yashwanth Reddy	Develop and integrate a Flask-based prediction module that accepts user input through a web interface, loads the trained machine learning model, and displays the predicted HDI category instantly.	Web Application

Step 2: Idea Prioritization

Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
Develop a Machine Learning model to predict the Human Development Index (HDI) category using socio-economic indicators such as Life Expectancy, Education, and GNI per capita.	High	High	1	Yes
Build a Flask-based web application that allows users to enter country development indicators and receive HDI predictions in real time.	High	High	2	Yes
Perform Exploratory Data Analysis (EDA), data preprocessing, feature selection, model evaluation, and visualization to improve prediction accuracy and interpretability.	High	High	3	Yes
